

Temperature Controller

IDP provide a variety of temperature control solutions based on modular controller, the solution is suitable for use in server rooms, refrigerated containers, industrial refrigerators, refrigerated trucks and more ...

- ✓ Two different temperature threshold for each sensor.
- ✓ SMS status at any time by calling the controller.
- ✓ Alerts delay can be set.
- ✓ Support end alert - when the temperature back to normal.
- ✓ SMS nagger every few minutes.
- ✓ Internal memory of 60,000 records, graph view and csv export.
- ✓ Alerts up to 10 phone numbers via SMS or call.
- ✓ Contain 3G cellular modem.
- ✓ Optional - SNMP / MQTT / SMTP Alerts.
- ✓ Power failure alert (only in models with backup battery).

The solution is based on modular controller, we provide tailor made changes on hardware / software
